

We Make Learning Happen

NO MATTER WHAT FUTURE YOU DREAM OF — whether it's in science, business, health care, the arts or public service — San Francisco State University can make that dream a reality.

A third of SF State students will be the first in their family to earn a college degree.

SF State offers bachelor's degrees in 78 disciplines, master's degrees in 62 disciplines and more than 50 certificate and credential programs.

If there's something you want to learn, SF State can make it happen.

You'll be learning from the best, too. SF State's faculty includes Guggenheim Fellowship recipients, Emmy Award and Pushcart Prize winners, National Science Foundation honorees and other internationally recognized leaders and innovators. They regularly work with Apple, Google, Facebook, the Smithsonian Institute, the National Institutes of Health, NASA and Pixar.

And it's not just great teachers that make SF State special. There's the picturesque campus less than a mile from the Pacific Ocean. There's the unique beauty and charm of San Francisco and the innovation and entrepreneurial passion of nearby Silicon Valley. And there's the vibrant campus life energized by nearly 30,000 students, more than 200 clubs and student organizations — and possibly you.
